Library and Documentation Service

Research support service: the beginning

- Libraries at a UV have a large tradition with journal management and informal research support
- 2016: research support at libraries become a service. That means there's an structure and human resources working specifically in helping researchers in their publishing job.

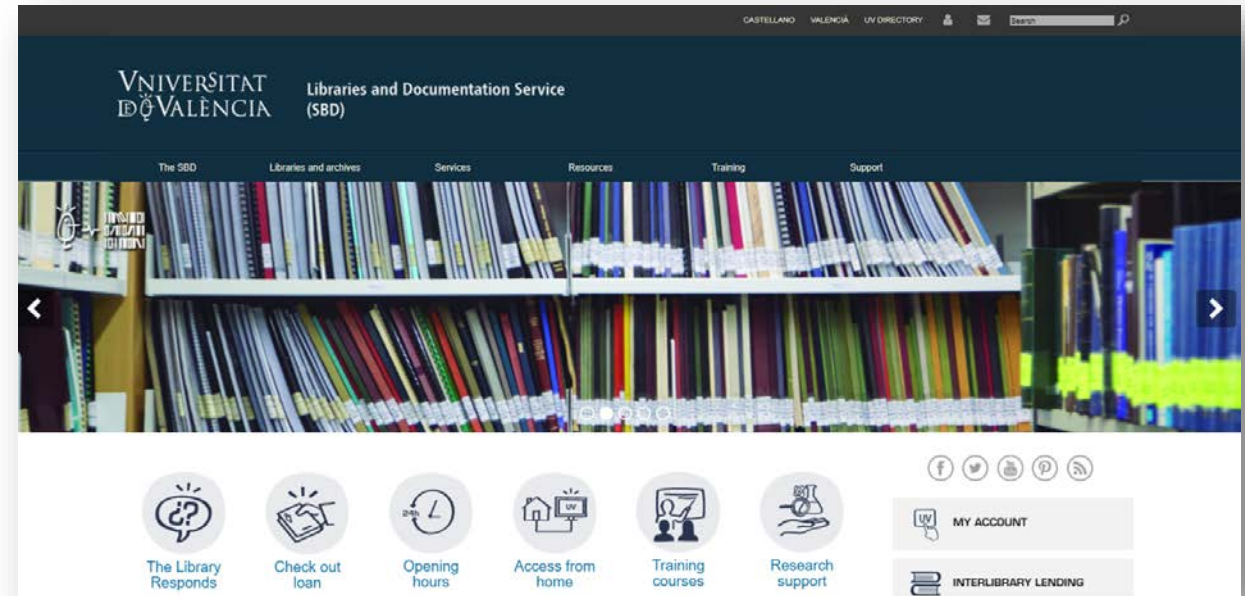

Research support: what we do

Our libraries offer:

1. Document supply to researchers
2. Learning and guidance about strategic publishing (profiles and identifiers, where to publish or not to publish etc.)
3. RODERIC (Open Access repository)
Helping researchers to deposit their papers
4. Other services: DIALNET, Suport + Indicis, etc.

What we've learned...

We must work together:

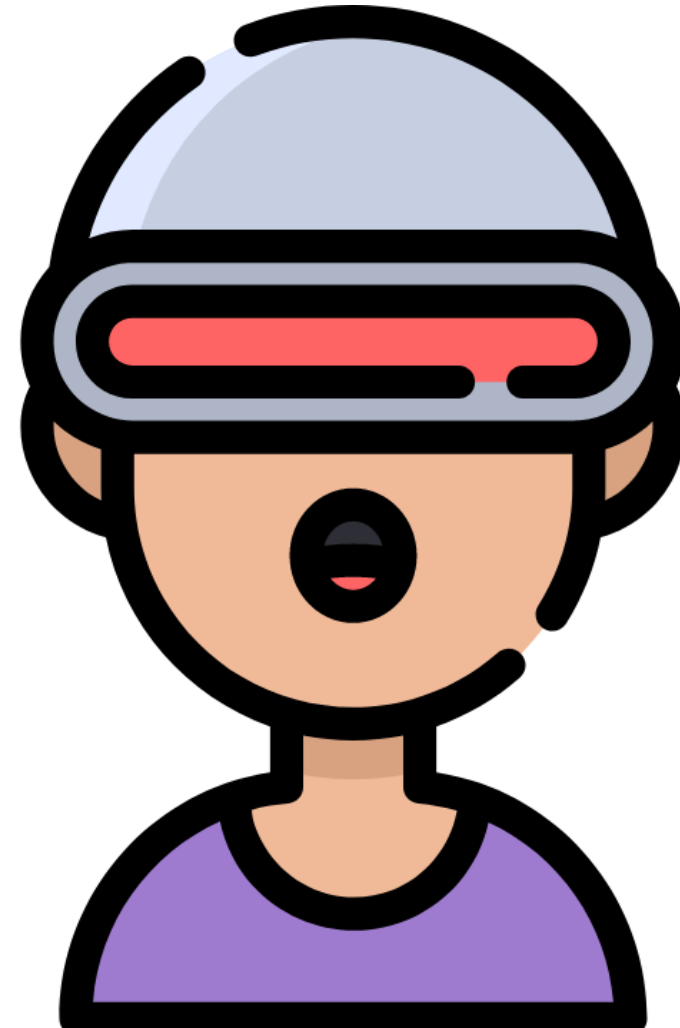

- Libraries and central sections
- With researchers
- With other services
 - Informatics
 - People who manage research projects...
- Out of UV: learning from other institutions, hospitals...

The future...

- Data management
- Journals: Prices, charges, ways to open publish...
- Plan S: the next challenge (Spain has not yet signed it)

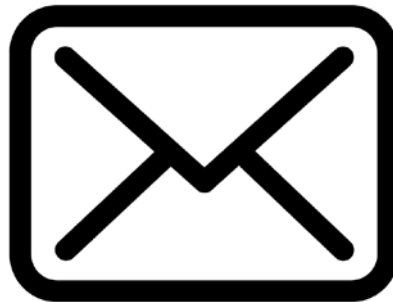

Any question??

Thank you!
